

# Crewing CRM

The right way to run your business

# What is the Crewing CRM?

Crewing CRM is a SaaS service that provides you with access to your data 24 hours a day, 7 days a week, 365 days a year internationally;

SaaS (Software as a Service), is a way to release you from the software technical support and equipment;

\* Just imagine a situation when you need to find an important information urgently without having access to your PC.

# How to find the information you need quickly?

Crewing CRM is a comfortable interface with a possibility of making a customization work due to your needs;

A flexible search will allow you to find the information you need immediately;

\* There are some moments when quickness in the searching process is very important and losing time for selecting search criterion while working with an application isn't acceptable.

# Is there a possibility to generate reports in a convenient way?

Upon your request Crewing CRM System can be supplemented with any reporting form as well as integrated with online form on the web site of your company;

\* It's far more convenient to get a summary information based on a report. You can as well provide the seamen with the possibility to enter their personal data in your database. As a result you will spend much less time on summarizing and data input.

# Can you remember the expiry date of seamen's documents or their contract expiration date?

Crewing CRM System will allow you to set up different reminders whether it be a validity period of the document or another important date such as contract expiration date for example;

\* You needn't track seamen's documents dates or contracts. The application will do it itself. Reminders can refer both to one seaman and to a group of seamen classified monothetically, holding the same position for example. A message with a reminder will be e-mailed to you. Also, you will see the same message in the application.

# Are you sure of data security?

Crewing CRM is :

- double encryption of all passwords;
- protected SSL connection;
- daily archiving your data on the particular server;

\*Double encrypting rules out the possibility of cracking the password using [rainbow tables](#). A cryptographic [SSL](#) protocol eliminates the risk of capturing data during a transmission between a server and the client. Daily archiving your data is a precaution in case of data reconstruction.

# What should we do to start work?

You should:

- Contact us;
- Present your requirements to the system;
- Give us your data in any form is convenient for you for importing it into the Crewing CRM system;

We should:

- Modify the software following your requirements;
- Import your data into the Crewing CRM system;

# Do you still have doubts?

Our [demo](#) version is always available. We can as well provide you with a full application version for testing maintenance if requested.

If you have any further questions, please don't hesitate to contact us.
